## ABOUT Us

- *State of the art, nationally-recognized emergency response facility since 1991*
- *Internationally respected manufacturer with 75 patents in healthcare and home control systems*
- *Physician recommended*

## HOW IT WORKS

- Wireless system sets up in minutes
- Wearable wrist pendant and auto fall detectors summon help during emergencies
- Medical buttons near floor can be pressed in all common fall areas
- Medication reminder feature alerts loved ones if customer fails to follow routines
- Monitored smoke and carbon monoxide detectors automatically protect against disaster
- Inactivity sensor provides back up and alerts loved ones if patient fails to move on regular schedule

## WHO BENEFITS

- Family and friends who want the assurance and peace of mind that loved ones are protected.
- Individuals who want to preserve an independent lifestyle in a secure and familiar setting.
- Caregivers who want to be proactive about supervision and safety for those at-risk.
- Assisted living expenses are spiraling out of control. We help keep individuals safe at home.

## WHY NOW

- More than 11 million seniors - 1 of every 3 - will fall this year
- Falls are the #1 cause of death for seniors
- The number of deaths from medication mistakes is up 700% over 20 years
- The risk of death by fire increases 500% between ages 65 and 85
- Unintentional accidents are the 5th leading cause of death

## 4-STEP FALL PROTECTION STRATEGY

- Water-proof, submersible pendant on breakaway cord
- Multiple medical alert stations in all common fall locations
- Auto-Fall Detector for wandering with automatic signaling if unconscious
- Inactivity sensor in case of non-movement

## 21 REASONS OUR CUSTOMERS DEPEND ON US

*Our "EMT" operators have superior training to handle the critical situations that occur daily*

- Falls and fall related injury
- Shortness of breath or difficulty breathing
