

## Medical Alarm – Comparison Chart

### Two (2) Way Voice Pendant\*

Product/Features	MediPendant™	Competitor **
RMR VS. NON-RMR	Manufactures ONLY RMR products for security industry	Manufactures PRIMARILY non-based RMR products
Beta Testing/Marketplace	YES – tested by hundreds of users – thousands of existing customers	NO known testing of product – few, if any existing customers to date
Battery Life (talk time)	Up to 6 hours of continuous talk time	Must swap battery every 3-4 hours depending on use
Battery Life (stand by)	Up to 2 years	3 to 4 months
Replacement Battery	Replaceable battery can be found at any retail store and lifetime replacement program available	Replacement battery MUST be purchased through the manufacturer and is very expensive
Audible/Visual warning tones for low battery in base unit	YES	No
Audible/Visual warning tones for loss of phone line	Automatic	Only if user presses button on pendant
Water Resistance	YES – may be used in the bath or shower	Splash resistant only/not recommended to get wet
Out of Range Indicator	YES – even when pendant is in use	Only during testing, not during an actual call
Audible/Visual Loss of Power indicator	Audible tone and flashing light	Flashing light
System Programming – convenience/ease of use	Simple programming directly into the unit with handset	Must be done by calling 3 <sup>rd</sup> party phone, in addition to handset – very confusing
System Programming - tampering	Tamper-proof – May only be programmed by a trained installer	The switch on the base may be tampered with by anyone, at anytime
